To: **All Interested Parties**

From: Bishop International Airport Authority

Date: August 28, 2023

RE: Addendum #1 to Bishop International Airport Authority Request for Qualifications for Professional Stormwater Pollution Prevention, Deicing Management, and Environmental Compliance Services.

Questions were submitted and clarifications requested by interested proposers. All comments and questions were reviewed and considered. They are summarized below. If a question or clarification resulted in no change to the RFP or additional clarification, it is because it was not in its best interest to make the change or sufficient information is already presented.

QUESTIONS/COMMENTS RECEIVED

Question 1 The RFQ instructs the Proposer to “List subcontractors that may be used during the duration of the agreement.” As part of that listing does the Authority expect the Proposer to specifically identify all possible service providers such as analytical laboratories, drillers, surveyors, ,etc.?

Subcontractors that are expected to be used by the Proposer during the normal course of service should be listed. It is understood that the preferred subcontractor may not be available at the time of service. Contingent subcontractors do not need to be listed in the proposal. In the event a preferred subcontractor is not available, as necessary, the contingent subcontractor will then be vetted.

Question 2 What is the commencement date of the contract in question?

The Airport Authority Board selection approval will occur at an Airport Authority Board meeting, either during the September 26 or October 24, 2023 meeting. Once approved by the Airport Authority Board, the contract will become effective upon execution of agreement by both parties.

Question 3 Provide the incumbent consultant.

The Airport Authority currently has an agreement with LimnoTech for the requested services.

Question 4 Provide the previous contract award amount.

Authorization amounts are approved annually by the Airport Authority Board. Previous annual expenses for the deicing management and stormwater pollution prevention services were as follows:

2018 - \$110,468

2019 - \$147,081

2020 - \$152,805

2021 - \$141,334

2022 – \$148,940
